What differentiates you from other physicians in your field?

I truly rejuvenate my patients from the inside out, and from top to bottom. I am a hair transplant surgeon but also do non-surgical hair restoration. I perform transformative skin rejuvenation and a non-surgical facelift that takes people back decades in time without a single cut to the face. I use injectables not just to fill the face but to contour structures to enhance natural beauty. I have a deep interest in state-of-the-art treatments with PRFM (platelet-rich fibrin matrix) and am one of just a handful of physicians in the world certified in the Vampire Facial and Facelift, Vampire scalp treatment, O-Shot, Wing Lift and P-shot.

Bawa Medical is a center of excellence for sexual rejuvenation. I treat women with the O-Shot (orgasm shot), Wing Lift (labial rejuvenation) and life-altering vaginal rejuvenation with laser therapy. I treat men with erectile dysfunction of various types with the P-Shot as well as acoustic wave therapy. My technique for these is painless, and many of my patients get these not to combat a problem but to naturally enhance their pleasure. Hormones are an integral part of hair, skin and sexual health so we do hormone

therapy as well as nutritional and immune supplementation with IV therapy. We also do healthy weight-loss programs.

How did you get into this field?

I am one of the 40% of women who have visible hair loss by the age of 40. I underwent a hair transplant that went wrong. It inspired me to change the course of my career in medicine.

How do you combat stress?

Time with my twin 10-year-old sons, travel, live music and photography.

What do you find most rewarding about your career?

When I practiced emergency medicine, I saved lives in critical situations, but what I do now enhances lives and relationships in a way that my patients did not consider possible. Their gratitude makes every single day at work fulfilling.
